Resene **Furniture** and **Decking Oil**

Resene Furniture and Decking Oil is designed for direct application to timber decks and furniture to enhance and restore the timber colour and provide protection against water, fungi, and U.V. light.

The product is designed for annual application to keep decks and furniture in good condition and assist with water repellency.

exterior

Typical uses

- New and weathered timber
- Timber outdoor furniture

Physical properties

Vehicle type Dry time (minimum) 24 hours Recoat time (minimum) 24 hours Coverage Dependent on surface Usual no. of coats Toxicity

Thinning and clean up

Oil, resin, wax blend Solvent Hydrocarbon Colour Amber Finish Penetrating type

VOC

Contains no isocyanates or heavy metals Do not thin, clean up with mineral turps

c. 320 grams per litre (see Resene VOC Summary)

Performance and limitations

Performance

- 1. Enhances the natural colour of new timber
- 2. Enhances the look of weathered timber decks.
- 3. Easy application.

Limitations

- Will not kill existing mould use Resene Moss & Mould Killer (see Data Sheet D80).
- Will not penetrate through existing coatings. Such areas will need excess wiping off.
- Will lose reactivity if container is contaminated with water.
- 4. Will typically require maintenance annually.
- 5. Trafficable areas coated with this unmodified product will not comply with the Building Act Clause 1.3.3(d).

Furniture and Decking Oil

Surface preparation

Exposed timber (greater than one week)

Remove any gross contamination and semi-detached cellulose fibres. Apply Resene Moss & Mould Killer (see Data Sheet D80).

New timber

Ensure timber is dry and free from dirt, dust and loose material.

Caution

Sanding dusts from some hardwoods are considered carcinogenic and all old timber sanding dusts should be considered potentially harmful. Always wear an efficient dust mask.

Sanding dust from old lead or chromate based paints or old building materials containing asbestos may be injurious to the health if inhaled or ingested. Seek expert advice if the presence of these materials is suspected.

Application

Apply by brush, roller or spray. Saturate surface with Resene Furniture and Decking Oil. Badly weathered surfaces may take up to 3 square metres per litre; new timber will require 10-12 square metres per litre.

Always trial Resene Furniture and Decking Oil on a representative piece of timber first to ensure it gives the result you want on the actual timber you are staining.

New timber should be treated with Resene Furniture and Decking Oil before assembly. Pay special attention to the underside of decks, as they will be difficult to coat after the deck has been assembled.

All faces of the timber should be treated with special attention to end grains.

Precautions

- Will not penetrate through existing coatings or very hard latewood bands. For best results wipe excess Resene Furniture and Decking Oil off with a dry, absorbent, lint free cloth rubbing along the grain.
- 2. Contains powerful fungicides. Avoid skin contact. If any skin contact occurs, wash skin thoroughly with soap and water. Do not scrub the skin.
- 3. FLAMMABLE keep away from heat and open flame. Keep closed when not in use.
- 4. Avoid breathing vapour use with adequate ventilation.
