

ThermoSpan EPS Panels

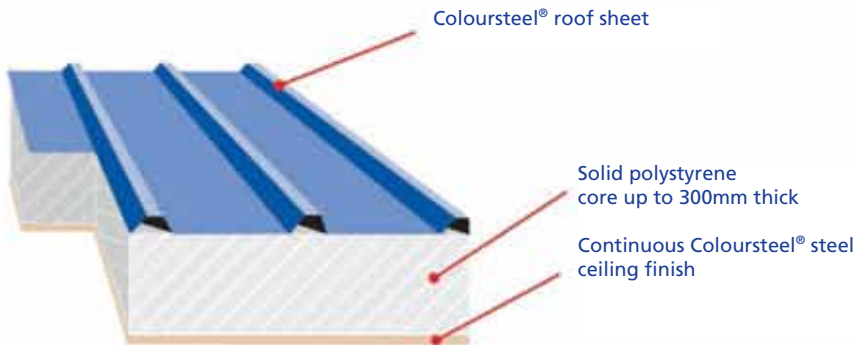

The 3-in-1 Roofing Solution

 **Metalcraft**
Insulated Panel Systems

ThermoSpan EPS Panels

3-in-1 construction delivers:

- Roof sheet
 - Insulation
 - Ceiling
- All in one composite panel

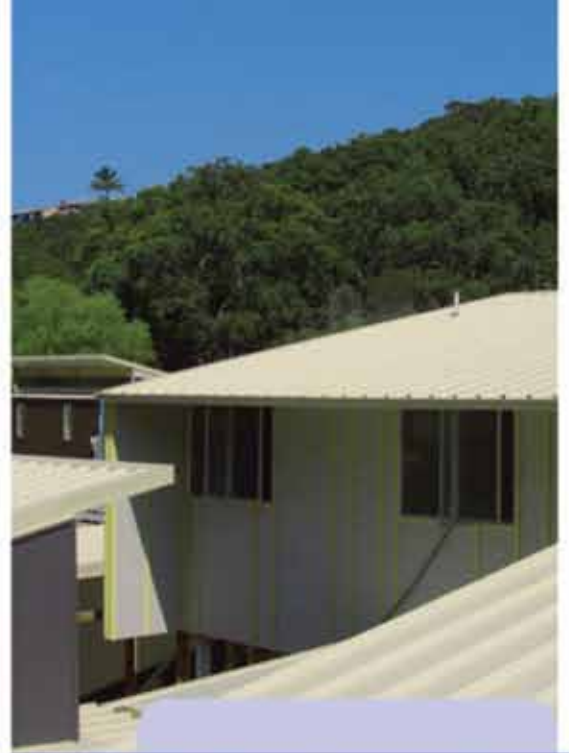

Introducing ThermoSpan EPS Panels, the innovative, versatile, all-in-one interlocking roof panel manufactured by Metalcraft Insulated Panel Systems right here in New Zealand. ThermoSpan EPS Panels combines the roof sheets, the insulation and the ceiling all in one tough, durable panel, saving on installation costs and cutting construction time.

The composition of a ThermoSpan EPS panel offers many advantages. A solid polystyrene core up to 300mm thick is bonded to a Colorsteel® roof sheet above, and a continuous Colorsteel® ceiling finish underneath. This means outstanding insulation performance, unrivalled strength and an attractive finish to complement your building.

ThermoSpan EPS Panels can save you up to 25 percent on conventional roofing costs. And not only do you save on winter heating bills, you keep cooler in summer, with lower or no air conditioning bills.

ThermoSpan FR, which has a Polyphen core, is also available and is the fire resistant alternative to ThermoSpan EPS. For further technical information on ThermoSpan EPS and ThermoSpan FR please refer to the products section at www.metalcraftpanels.co.nz or contact Metalcraft Insulated Panel Systems on (09) 262 0267.

Metecno NZ Ltd trading as Metalcraft Insulated Panels Systems is a part of the United Industries group of companies and also a part of the Metecno Group which has panel factories in Europe, Asia and Australia.

Blocks Heat

ThermoSpan EPS Panels polystyrene core give efficient, long-lasting insulation – summer & winter

Low Maintenance

Pre-painted ThermoSpan EPS Panels deliver a durable finish

Fire Proof

Fire proof option available

Strong, Durable

Laminated 2 layers of steel around polystyrene core for strength & durability

Versatile Design

ThermoSpan EPS Panels are not restricted to flat rectangular applications

Save Costs

Simple, quick, modular design reduces construction costs

Simple Construction

No rafters or battens required: cuts building time & costs

Guaranteed

ThermoSpan EPS Panels are sold with a 10-year guarantee
