

Product Code: TB12

Tactile Handrail Buttons for the sight impaired

For use on handrails as an indicator for the sight impaired that gives warning of a change in levels between steps and stairs.

Simple and fast to install, just drill a 6mm hole and tap it in with a soft faced hammer. The interference fit ensures a permanent fix.

Beautifully machined these little buttons are attractive, functional and cost effective.

Available in 316 satin and polished finish.
