The do-it-yourself Tile

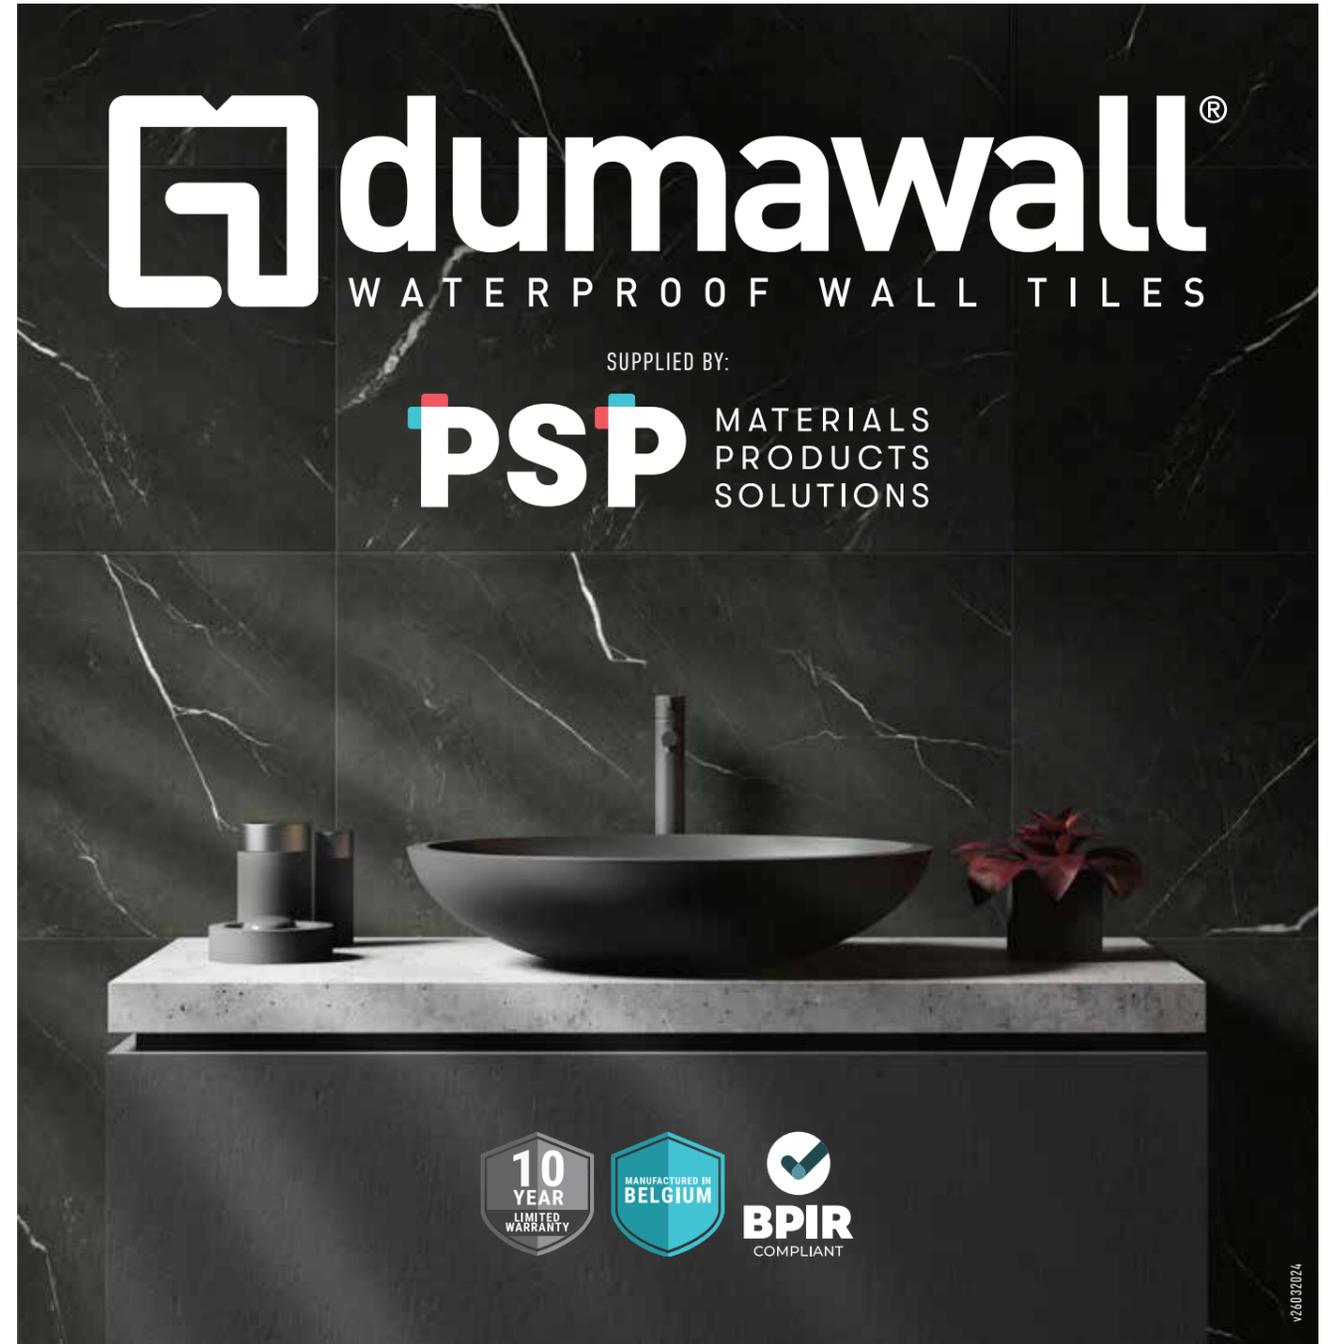

Installing DumaWall is quick and easy. Our tiles eliminate the need for grout and the multitude of tools, costs, and mess related to traditional tiling. DumaWall provides the look of traditional tiles, featuring a simple interlocking tongue and groove system. DumaWall can be easily cut on-site with a circular saw, hand saw, or jigsaw, providing the ideal home handyman solution at a fraction of the costs compared to a professional tiler.

NOTE: Where DumaWall tiles or panels are used in a wet area (such as a shower), the substrate must be waterproofed. DumaWall can be retrofitted over existing approved shower boxes, tiles and waterproof membrane systems. For more information, refer to www.building.govt.nz - Code of Practice for Internal Wet Area Membrane Systems.

DumaWall is a lightweight and easy to install impervious wall tile/panel. Produced with the revolutionary patented RCB[®] (Rigid Core Board) technology. DumaWall features an interlocking tongue and groove system that can be installed over existing wall coverings, making it ideal for renovation projects and new builds. Transform the chill of a cold tiled bathroom to DumaWall that is noticeably warmer.

Typical Applications include Bathrooms/ Shower Walls, Kitchens, Laundry Areas, Feature Walls, Changing Rooms & Vanity/ Mirror Surrounds.

Note: Due to different production processes between the DumaWall XL and DumaWall+ there could be slight colour differences if both products are installed in the same room.
