

PRODUCT: Pedestals

COMPANY: Outdure International Ltd.

DATE: 04/05/2018

PRODUCT DESCRIPTION

Outdure pedestals are an adjustable, self-levelling pedestal support system for tile, paving or timber decking over exterior membrane waterproofing. The system consists of:

- Outdure adjustable pedestal with self-levelling head in multiple sizes from 28mm to 550mm
- Accessories:
 - Tile cladding spacers (5mm, 10mm or 14mm) for use between wall/balustrade and tile/paver
 - Adjustment key
 - Shims (3mm)

Outdure pedestals can be installed over a concrete or timber substrate. It is recommended that the compatibility of the membrane and pedestals is checked before installation.

SCOPE OF USE

Outdure pedestals can be used within the scope of NZBC E2/AS1. Pedestals can be installed over concrete or ply substrates with a compatible membrane; also over concrete patio or foundations to facilitate level threshold doorways. Outdure pedestals are suitable for new or existing commercial and residential buildings. For more information on additional uses, visit www.outdure.com

STATEMENT OF BUILDING CODE COMPLIANCE

This system is designed, used, installed and maintained in accordance with the supporting technical information and additional conditions and limitations based on the Australian and New Zealand Building Code.

DESIGN GUIDELINES

Outdure pedestals are to be installed in accordance with good trade practice and Outdure's Installation Guides. Tiled and timber decks must be enclosed with a parapet or balustrade.

MAINTENANCE REQUIREMENTS

Periodic checking for loose Nurajacks especially if the substrate has moved.
