

Intermediate Fixed Point MS w/ Lining

Application

Soundproof intermediate fixed point construction for secure absorption of shear forces resulting from branch pipes. By means of intermediate fixed points the arising collateral forces resulting from branch pipe sections are securely absorbed. Especially applicable for soundproof demands according to DIN 4109.

Scope of delivery

Pipe Clamp Stabil D-3G with lining and pre-assembled fixed point adaption with single thread connection, suitable for sizes 200 up to 315

Installation

The entire fixed point module is pushed into the channel opening and locks automatically. While positioning the distances, the module is securely guided in the channel opening. Then hexagon bolts are tightened.

▷ For sizes 40 up to 160 Fixed Points MS with lining are used.

Type	W [kg]	Quantity [pack]	Part number
ZFP 200 MS m.E.	1.66	1	602445
ZFP 250 MS m.E.	1.89	1	602455
ZFP 315 MS m.E.	2.20	1	602465
