

TimberTech®

SUSTAINABLE OUTDOOR LIVING SPACE

TimberTech products are sustainable to the core – literally. TimberTech Capped Composite decking boards contain 85% of landfill diverted recycled household plastic food and laundry bottle material. The Advanced PVC boards contain 60% of recycled post use construction PVC products – using materials that ordinarily fall into the hard-to-recycle category. The result being that **TimberTech have diverted roughly 226 million kgs of waste and scrap from ending up in landfills annually.** 97% of the water used in this process is also recycled back through the system.

All of this is possible thanks to homeowners choosing TimberTech products over wood. **We have saved more than 3 million trees since 2001.** Some folks call it sustainability. We call it doing the right thing.

About TimberTech

TimberTech is a decking product that takes scratch, stain and fade resistance to the next level with natural and authentic looking hardwood graining. TimberTech comes in two configurations; Composite and Advanced PVC.

Traditional timber decks can develop splinters however, with TimberTech splinters are a thing of the past. Enjoy peace of mind that TimberTech decking won't crack, rot or split. TimberTech is also simple and easy to install; boards can be cut and installed easily with standard machinery and equipment.

TimberTech is available throughout New Zealand from PSP in a range of stunning decors with a premium finish that will surpass all other comparable products in the market. When combined with a range of 25 to 50-year warranties, TimberTech is the obvious choice for the discerning property owner.

TimberTech Advanced PVC Harvest, Landmark & Vintage Collection

Create a bold look with the dramatic yet charming TimberTech Advanced PVC Collection. Our capped polymer decking features proprietary materials technology that deliver a sophisticated, real wood finish that you'll never have to sand, stain, or seal. Every board showcases characteristics found in nature while boasting industry leading warranties and advanced performance technology that keep your deck looking good for decades to come.

TimberTech Advanced PVC decking breaks all the rules when it comes to traditional decking options. Featuring low thermal conductivity, making it cooler to the touch on a hot day (vs composite decking). The core is made from recycled PVC while the outer cap layer is made from virgin PVC, giving unrivalled resistance to scratch, dirt & mould. Additionally, TimberTech Advanced PVC decking is highly resistant to moisture damage like mold and mildew, and it won't splinter, crack, warp, peel, or rot.
